Abstract

Method for producing (1,1':4,1'') Terphenyl Compounds

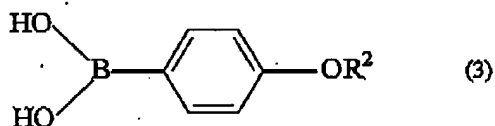

The invention relates to a method for producing [1,1':4,1'']-terphenyl compounds of the formula

which comprises reacting a metal aryl of the formula

with a boric ester at -80 to 40°C in the presence of an inert solvent, converting the reaction product by hydrolysis into a boronic acid of the formula

reacting the boronic acid, a boronic anhydride obtainable from boronic acid by elimination of water, or a mixture of boronic acid and boronic anhydride, with an alcohol, and reacting the boronic ester formed thereby with a biphenyl compound of the formula
